H.E.A.L. Comprehensive Wound Assessment – Half Day 4.5 HR

with **Christie Tuttosi, RN, BN, NSWOC, WOCC(C)**

This is our most in-demand session and the half-day does fly by!

Successful wound care is dependent not only on local care of the wound, but also understanding the etiology of the wound, addressing systematic issues, and assessing the whole patient.

This session covers all principles that affect wound healing, including the impact of and management of biofilm bacteria which is now known to be perhaps the most important single cause of delayed healing in wounds. We'll explain wound hygiene updated best practices, hard-to-heal wounds, pressure injuries, diabetic foot, case studies & more. WOUND HEALING 101 – the basics & more!

The last 1-hour will be a live on-camera dressings review & answering attendees questions. Learn about the choices in dressings by *their functional category differences* – what to use when where why. An opportunity to learn from your healthcare peer's questions being asked throughout the session. An opportunity for you to ask anything at all of the Wound Care Clinical with your hard-to-heal wound dilemmas or dressings questions. No names are mentioned, no names shown – ask anything. You walk away equipped with so much immediately applicable info, best practice, and evidence-based solutions for all things skin & wound.

Includes Live Virtual Wound Care Product In-Service
